EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald Heckenberg on 4/10/2009.

Claim 10, Lines 2-3 reciting, "wherein the television receiver has a capability of functioning as an" is replaced by "wherein the television receiver functions as an".

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 1/14/2009 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement has been considered by the examiner.

The Examiner notes that NPL document 2002-362702 has not been entered into the case, but has not been listed in the IDS.

Allowable Subject Matter

Claims 4-5 and 10-11 are allowed.

The following is an examiner's statement of reasons for allowance:

In regards to independent claims 4 and 11, the prior art of record fails to anticipate or rendered obvious the combined elements/steps of “wherein the display control means switches the mode of displaying information from the first mode to the second mode in response to manual clicking on the mark”, as recited in the claims and in conjunction with the remaining limitations of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

As stated in the previous Office Action, Potrebic fails to disclose that the mark can be accessed to switch the display of the first mode to the second mode and while Schneidewend had been previously used to reject the claims, Schneidewend only teaches accessing a mark on a channel to access other sub-channels, not using a mark on a program to access sub-programs. Therefore, based on the amendments made to the claims where the first and second modes are further defined, Schneidewend fails to teach the claimed limitations.

Applicant has further submitted Patent No. 7,065,777 in an Information Disclosure Statement. After further consideration, while Inoue teaches a calendar based EPG that shows an EPG with additional information in each program cell, however Inoue fails to teach accessing a mark in the program cell in order to display further sub-programs available for viewing.

Applicant has further submitted Patent No. 6,392,709 in an Information Disclosure Statement. After further consideration, Orito discloses an EPG that switches from a first mode to a second mode, however the information displayed in the program cell of Figure 10 in the second mode is only information about the contents and performers in the program itself and fails to identify sub-program information as claimed by Applicant.

Applicant has further submitted Patent Application Publication No. 2002/0038457 in an Information Disclosure Statement. After further consideration, Numata only teaches that the marks indicate whether the program listed in the program cell is to be viewed, recorded or is indicated as a favorite program.
